ICON HELMETS

ICON HELMETS ARE THE CULMINATION OF OUR UNIQUE RIDER DRIVEN DESIGN

An aggressive style, combined with peerless engineering, has carved ICON a unique niche within the riding community. Our commitment to quality has won us the prestigious J.D.

Powers customer satisfaction award, and accolades from riders the world over.

Whether your riding includes blasting high-speed circuits, storming the dirt of Baja, or strafing pockmarked highways; there's an ICON helmet for you.

AIRFRAME PRO

The modern riding position - higher rear sets, lower clip-ons - has dramatically altered how a rider interacts with the modern hypersport motorcycle. Compressed into an ever more compact shape, the rider's head positioning requires increased angle to maintain visibility and stability. With this in mind, ICON designed the AIRFRAME PRO™.

VARIANT

The VARIANT™ showcases handmade composite shells—premium carbon fiber and FRP matrixes. From its 3D molded shield to aerodynamically optimized visor, it has a style all its own. From streetfighters to sportbikes to cruisers to adventure bikes, the VARIANT™ is for those who ride outside the boundaries of convention. The VARIANT™ is our premier all-terrain option.

AIRFLITE

A neo-retro glimpse into one possible future, the AIRFLITE™ is the vessel of your dreams. The visually-defining shield makes a statement on the streets while the helmet's versatility and customizable ability speak to the development and design. Remove the shield, replace it with the AIRFLITE™ peak, and the helmet goes from street to dirt in a matter of moments. Combine that with a recessed twin-channel cooling system, HydraDry™ comfort liner, sculpted neck-roll, and internal speaker pockets, and you get the ultimate street-style helmet.

AIRFORM

For almost two decades, ICON Motorsports has come to define moto-street style. Proven design, comfortable fit, and superb quality for the maximum value, the AIRFORM™ helmet is an excellent entry point into the ICON family. Includes world-renowned HydraDry comfort liner, ventilation, and an inner DROPSHIELD for those rides that start before sunrise and end well after the sunset. Highly customizable for those who like to dial it in.

AIRMADA

The AIRMADA™ brings track level specs to the mid-price helmet category. Unique manufacturing processes allow for a significantly reduced shell size, thereby reducing both weight and drag. Its long-oval headform, a first in this category, offers a race fit while eliminating pressure points. The AIRMADA™ is an optimal choice for those wanting maximum performance at an attainable price.

ALLIANCE GT

For over a decade, the ALLIANCE™ lineage has come to define street style. Proven design, comfortable fit, and superb quality combine for maximum value. The ALLIANCE™ is an excellent entry point into the ICON helmet family. With the ALLIANCE GT™ we've kept the world renowned comfort and ventilation, and added an inner DROPSHIELD™ for those rides that start before sunrise and end well after the sunset.

SAFETY WARNING: Riding a motorcycle is a dangerous activity. No helmet can protect a wearer against all possible impacts. When riding, always wear a helmet, eye protection, protective clothing, gloves and boots. There is no assurance that serious injury or death can be avoided even if you wear a helmet. Take all precautions to avoid every risk when riding a motorcycle. This helmet is not meant for use as a fire retardant product and does not contain any fire retardant materials. Please ensure that your Icon® products fit properly. Improperly fitting products can impair your ability to control your motorcycle.

ICON ONE THOUSAND

Precision at speed: the Hypersport2 jacket is the upper echelon of the ICON line. A stylish blend of 1.1-1.3mm TrackSpec™ leather and textile chassis, coupled with ICON's Attack Fit, creates a jacket built for velocity. Full D30® impact protector package (elbow, shoulder, back), and the accordion leather flex zones allow for a jacket that contours to your body straight off the rack. The deep chest pockets that double as chest vents, retro-reflective hits, and padded microfleece comfort liner collar are just a few of the rider-centric details you'll find. For the throttle jockey, we've added an internal waist zipper that connects to the Hypersport2 pant, perfect for when you want to go to the track and wind it out.

CONTRA2™ JACKET

ICON MOTOSPORTS

Ol' Faithful just got an update. We've listened to your feedback, applied it, and reworked a classic from the ICON line. The durable textile Contra 2 jacket checks all the boxes. The tried-and-true Iron Weave Mesh™ panels allow intake and exhaust airflow, dramatically reducing the chance of overheating, and the jacket is further reinforced with ballistic nylon in the tumble zones. Industry-leading D30® shoulder, elbow, and back impact protectors come standard. The cuff vents, retro-reflective hits, and anti-flap arm straps are just a few of the creature comforts in this feature-rich jacket. A SatinCore liner adds modularity, and the TPU chest badging provides the classic ICON steeze. Check, check, and check, the Contra 2 jacket has what you need.

HYPERSPORT GP™ GLOVE

ICON MOTOSPORTS

ICON is always searching for the upper hand; we’ve found it with the Hypersport glove. The materials and construction of the Hypersport GP glove have been purposely chosen for their innate abilities to provide this advantage. It all starts with a French cowhide and kangaroo chassis. The French cowhide backhand, supple & strong, provides excellent comfort and flexibility. The kangaroo palm, a hallmark of purpose-built track gloves, provides optimum abrasion resistance and dexterity. Additional panels of digital BattleHide™ goatskin are located in areas of high-wear from grips and the palm sliders are in case of a high-velocity asphalt encounter. The mechanical articulation panels, which run the length of each finger, provide excellent flexibility from the very first wear—no break-in period needed. Key construction techniques include ICON’s exclusive floating knuckle with D30® underlay, which allows for maximum knuckle articulation, and an out-seamed finger box for all-day comfort. The Hypersport gloves feature full knuckle coverage from the vented TPU/Polycarbonate knuckle plates. The gauntlet also features large external TPU wrap-around coverage and perforated ventilation panels. Multiple hook & loop closures allow for a secure fit.

CONTRA2™ JACKET

ICON MOTOSPORTS (WOMENS)

Ol' Faithful just got an update. We've listened to your feedback, applied it, and reworked a classic from the ICON line. The durable textile Contra 2 jacket checks all the boxes. The tried-and-true Iron Weave Mesh™ panels allow intake and exhaust airflow, dramatically reducing the chance of overheating, and the jacket is further reinforced with ballistic nylon in the tumble zones. Industry-leading D30® shoulder, elbow, and back impact protectors come standard. The cuff vents, retro-reflective hits, and anti-flap arm straps are just a few of the creature comforts in this feature-rich jacket. A SatinCore™ liner adds modularity, and the TPU chest badging provides the classic ICON steeze. Check, check, and check, the Contra 2 jacket has what you need.

NIGHTBREED™ JACKET

ICON ONE THOUSAND

It is yet again another late night, so what's it gonna be, oh brothers? The city is filled with monsters, and perhaps tonight you're one of them. The ICON 1000 Nightbreed jacket is your perfect accomplice. The stretch textile chassis combined with the ICON Sport Fit creates a jacket that's light, nimble, and ready to rumble. It comes standard with a full suite of D30® impact protectors (elbow, shoulder, back), providing you with peace of mind should your ride take an unfortunate turn south. Black retro-reflective pops lend to visual conspicuity when you need it and stealth when you don't. Set aside the milk and ultra-violence: it's time to ride fast and run the city.

HELMET FITMENT

HELMET SIZING INFORMATION

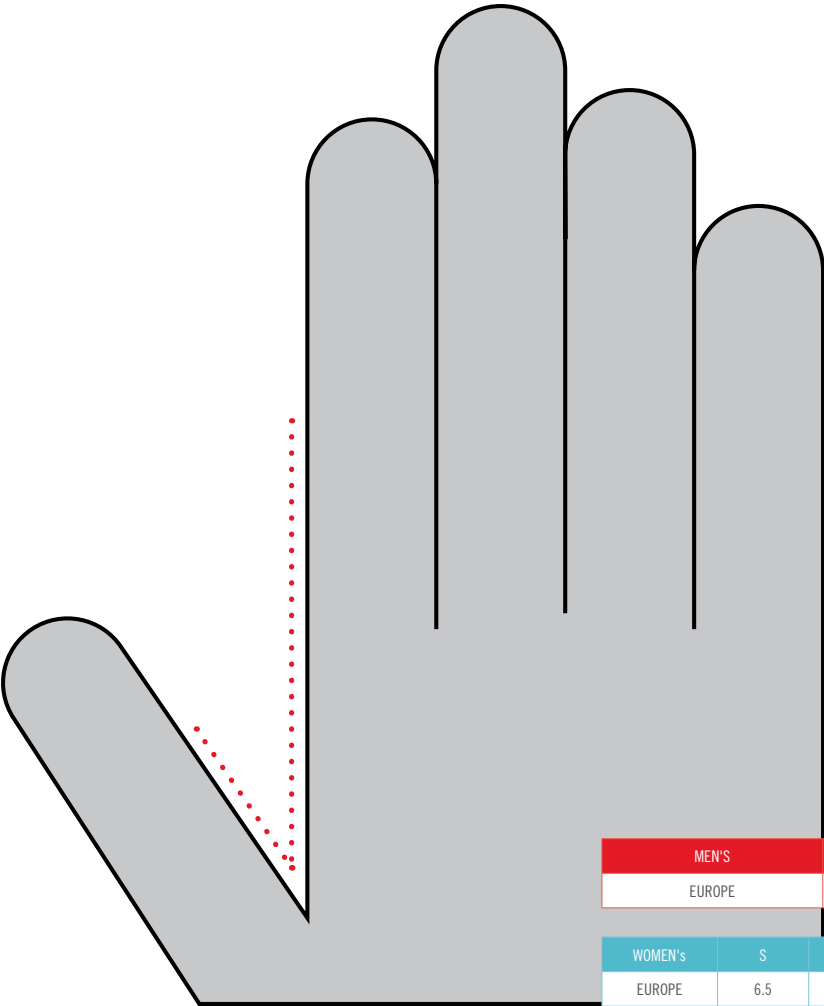

To achieve proper helmet fitment, begin by finding your head circumference size using the method described below. Remember that the helmet size you choose should fit around the crown of your head comfortably with no pressure points. The cheekpads should fit firmly around your face. Once your chin strap is fastened, grab the chin bar of the helmet and move it side to side. Your cheeks should move with the helmet, which should not slide across your face. Different thickness cheek-pads can be purchased to obtain the perfect fit. Ask your dealer or visit www.rideicon.com for more information.

HEAD MEASUREMENT INSTRUCTIONS

Wrap a flexible tape measure around your head approximately one inch above the eyebrows and ears. Use this measurement (in either inches or centimeters) to find your helmet size in the chart below.

GLOVE FITMENT

HOW TO DETERMINE YOUR GLOVE SIZE

ICON glove size is determined by measuring the width of your palm at its widest point - a little below the knuckles. To get this measurement, place your hand on the page as shown with the crook of your thumb positioned at the “V” intersection of the two dotted lines and on top of the Men’s and Women’s measuring bars.

THIS CHART SERVES ONLY AS A GUIDE. TO ENSURE THE PROPER FIT ALWAYS TRY ON THE ACTUAL PRODUCT.

JACKET FITMENT

JACKET SIZING INFORMATION

There are three variables to consider when sizing an ICON jacket. The first two are the chest and sleeve measurements, which are what your jacket size is based on. The third is the jacket fit type, which defines the “cut” of the jacket (Attack, Sport, or Relaxed). Instructions, sizing charts and jacket fit details can be found below. The fit type of every Icon jacket can be found in the first bullet point of the copy block for that individual product.

CHEST MEASUREMENT INSTRUCTIONS

While standing with your arms relaxed at your side, wrap a flexible tape measure around your chest at its largest point. The tape measure should go through your armpit and stay parallel with the floor while taking the measurement.

SLEEVE MEASUREMENT INSTRUCTIONS

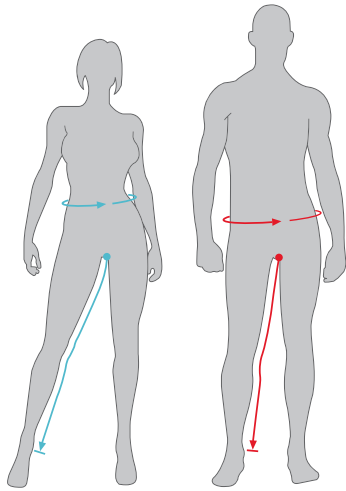

While standing with your arms relaxed at your side, place one end of a flexible tape measure on your spine at the base of your neck. Measure over the top of your shoulder, down over the point of your elbow, and finish at the wrist bone.
