MOOSE RACING®

STEWARD BAYLOR

MORE THAN JUST A BRAND

1986 was an epic year that saw the Rock & Roll Hall of Fame induct Elvis Presley into its inaugural class while 5'7" Spud Webb won the NBA's Slam Dunk Contest, but those accomplishments pale in comparison to the birth of Moose Racing. What started as a group of riders finding ways to make their trail experiences better, has since evolved into the worldwide leader in offroad motorcycle parts and accessories that we know today. A few trail tools and hard parts soon became the standard for outfitting riders from head to toe in stylish and functional gear. Like any great brand, we continue to grow and have added performance to the mix as well as great looking casual apparel and all the garage accessories that will make you the envy of any neighborhood gathering. Anyone can go online and find the cheapest parts and accessories, but why not separate yourself from the herd and demand the best. When you're miles from the nearest gas stop we know you won't regret that decision. We have been on the gas since '86 and don't have any intentions of slowing down now. Our group always has room for another enthusiast and we'd love to have you along for the ride.

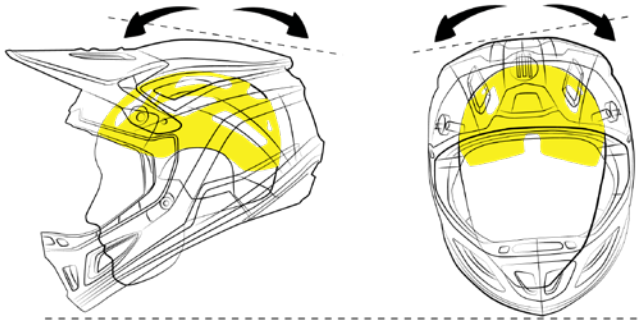
NEW MATTE BLACK FINISH!

Mips®

NEW MIPS TECHNOLOGY!



HOW MIPS WORKS

In a helmet with MIPS Brain Protection System (BPS) the shell and the liner are separated by a Low Friction Layer. When a helmet with MIPS Brain Protection System is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. The MIPS BPS is designed to add protection in helmets against the rotational motion. The rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration) that both affects the brain and increases the risk for minor and severe brain injuries. MIPS BPS has been scientifcly proven to reduce rotational motion when implemented in a helmet by absorbing and redirecting rotational energies and forces transferred to the brain.

ABRASION RESISTANT GLOVE LINERS

- Tuff-n-Lite® material is ounce for ounce up to 15 times stronger than steel, but it's as soft and flexible as cotton
- Tuff-n-Lite® is created by a unique, multi-patented process that combines natural and synthetic fibers for almost unimaginable strength
- Tuff-n-Lite® has a core fiber that's combined with strands of other fibers - that give characteristics like strength, abrasion-resistance, heat-resistance and softness
- Tuff-n-Lite® will not sacrifice its strength when wet or exposed to ultraviolet sunlight
- Unlike the high-strength fiber fabrics, it is not affected by disinfectants or common household bleaches
- Helps protect against chafing and blisters while riding and provides insulation while cold-weather riding

CARBON FIBER SKID PLATES BY ELINE

- Thick composite plates with many advantages over aluminum
- The use of antiballistic composite material gives our composite a longer fatigue life and greater tensile strength than aluminum
- Composite plates are molded to the exact shape desired, making for a closer fit and more protective plate
- Composite plates absorb vibration and do not amplify sounds like aluminum plates do
- When hit hard, aluminum permanently deforms, bending frame tubes and slicing into water pumps
- Composite plates will bounce back from hard hits and look great long after aluminum plates give up
- Skid plates protect the side engine cases and the water pump in addition to the frame and the center case
- Designed with a high front to keep mud from building up on the engine
- Mounting hardware included

BRAIDED CLUTCH LINES

- Venhill Engineering in the UK makes Moose Racing® Stainless Steel Clutch lines to the highest specifications
- Each line is made from top quality PTFE coated hose, wrapped with British made stainless steel, and PVC coated for protection and great looks
- Rubber protection boots and extra rigid tubing are used to protect vulnerable areas from heat and impact and to prevent hose flex under compression
- Each line is designed to withstand a minimum of 14.000 PSI
- Installing our stainless lines gives a large performance increase by significantly reducing expansion under pressure, and absorption of water when compared to stock rubber hoses

STAINLESS *STEEL BRAIDED BRAKE LINES*

- Swivel union ends are the secret to easier fitting, and ensure a kink and stress free installation
- Venhill Engineering in the UK makes Moose Racing® Stainless Steel Brake Lines to the highest specifications
- Each line is made from top quality PTFE coated hose, wrapped with British made stainless steel, and PVC coated for protection and great looks
- Rubber protection boots and extra rigid tubing are used to protect vulnerable areas from heat and impact and to prevent hose flex under compression
- Each line is designed to withstand a minimum of 14,000 PSI
- Installing our stainless lines gives a large performance increase by significantly reducing expansion under pressure, and absorption of water when compared to stock rubber hoses

520 FB-RING CHAIN

- This is the top of the line. The strongest, most durable sealed chain that we offer
- FB = Fine Blanking, an incredibly precise manufacturing process that yields perfectly cut links
- Tight tolerances make the plate, pin, and bushing union accurate and strong
- Due to the accuracy of the cuts and the use of stronger alloyed steel the FB has our highest tensile strength rating, nearly 8,000 lbs
- Special sealing rings are chemically treated to gain strength and reduce friction
- The FB treatment allows the O-rings to be impregnated with grease
- FB rings are stronger and more durable than X-rings, with significantly less friction
- Gold links and rollers, silver inner plates, pins and bushings
- Clip-type connecting link included
- CC recommended / average tensile load 450cc & above / 7,937 lbs
- Replacement connecting M link available

STEEL *REAR SPROCKETS FOR ADVENTURE TOURING*

- Manufactured from premium-quality C45 high-carbon steel
- CNC precision-machined to assure tight tolerances
- Machined with lightening holes
- Black powder-coated finish

ALUMINUM *REAR SPROCKETS FOR ADVENTURE TOURING*

- 100% German aluminum using ISO 7075-T651 for these sprockets receives an extra tempering which reduces distortion and provides optimal thickness
- 100% machined, no stamping or grinding
- Optimal tooth thickness results in maximum tooth and chain contact
- We leave the "cleaning" grooves out of our sprockets, because more aluminum contacting your chain means longer chain and sprocket life
- Moose Racing rear sprockets come anodized in black

STEEL *REAR SPROCKETS*

- Manufactured from premium-quality C45 high-carbon steel
- CNC precision-machined to assure tight tolerances
- Machined with lightening holes
- Black powder-coated finish

ALUMINUM *REAR SPROCKETS*

- 100% German aluminum using ISO 7075-T651 for these sprockets receives an extra tempering which reduces distortion and provides optimal thickness
- 100% machined, no stamping or grinding
- Optimal tooth thickness results in maximum tooth and chain contact

HIGH PERFORMANCE *4-STROKE PISTON KITS BY CP PISTONS*

X-STYLE

DLC PIN

BOX-STYLE

GASKET SET INCLUDED

- Moose Racing® pistons feature x-style forgings and fully boxed-style (race pistons) forgings for ultimate strength, minimizing friction, durability, power, and weight reduction
- We are proud to offer our Pro Race Piston kits for select models
- The Pro Race Piston increases the durability by reducing the stresses in the pin bore area
- The Pro Race Piston allows the pin to flex while removing stress from the area
- Full radius dome designs maximize quench while eliminating hot spots that promote detonation
- Internal bracing maximizes durability while decreasing friction in the pin assembly
- Fully-boxed style (race pistons) forgings come standard with skirt coating which reduces friction, which in turn reduces heat. These are called out in the application chart
- Our race piston kits include a DLC pin. This technology has been proven and used because of its high resistance to abrasive wear, which extends the service life and reliability under extreme conditions
- Each Moose Racing® piston kit includes a high performance piston, wrist pin, rings, circlips, and a top end gasket kit
- Replacement parts available
- BE SURE TO USE RACE FUEL WITH SOME APPLICATIONS (CALLED OUT IN CHART)
- Made in the USA

RADIATOR *CAPS*

- Old and faulty radiator caps can cause steam and fluid to be pumped out of the radiator overflow hose
- A replacement cap is the least expensive and easiest way to solve or troubleshoot your liquid cooled bike/ATV radiator problems
- Upgrading to a high pressure 1,6 bar, 1,8 bar or 2,1 bar from the stock radiator cap is the simplest and least expensive way to avoid over-boiling your engine
- Raising your cooling system's maximum operating pressure increases your coolant's boiling point, allowing you to ride harder and longer
- Black finished cap
- Universal fit for most Japanese models
- High temperature corrosion resistant silicone seals

*SPARK ARRESTOR REPACKS
WHEN CHOOSING A REPACK KIT FOR A SPARK ARRESTOR SILENCER, SUBTRACT 5.5" FROM THE LENGTH OF THE MUFFLER BODY FOR THE ACTUAL PACKABLE LENGTH AND ORDER BASED ON THAT LENGTH. EXAMPLE: A FMF TURBINE CORE 2 WITH A 14" LONG BODY WILL HAVE AN 8.5" PACKABLE LENGTH. ORDER THE NEXT LONGEST LENGTH . USE THIS RULE FOR PRO CIRCUIT ALSO.

**CUT TO LENGTH UNIVERSAL PILLOWS
PART NUMBERS PROVIDED ABOVE ARE DESIGNED TO PACK ALL MUFFLERS WITH CORE DIAMETERS BETWEEN 1.75" - 2.25" AND SHELL CIRCUMFERENCES BETWEEN 12" AND 13.5". MEASURE THE DISTANCE AROUND THE OUTSIDE OF THE MUFFLER'S SHELL TO DETERMINE ITS CIRCUMFERENCE.

WHEEL *SPACER FRONT OEM STYLE*

- Replace or upgrade OEM wheel spacers with these durable parts
- Water and dirt grind between wheel bearing seals and soft OEM aluminum wheel spacers, this creates grooves and allows for bearing contamination
- Moose Racing® wheel spacers feature hardened steel contact surfaces. This makes for a tight seal that will last for years and keep your bearings fresh
- Our spacers are made from either anodized aluminum with a press fit - hardened steel shell, or solid - hardened and ground bearing steel, depending on application
- Upgrade to Moose Racing® wheel spacers when you replace damaged wheel bearings, or before you have to

WHEEL *SPACERS*

- Replace or upgrade OEM wheel spacers with these durable parts
- Water and dirt grind between wheel bearing seals and soft OEM aluminum wheel spacers, this creates grooves and allows for bearing contamination
- Moose Racing® wheel spacers feature hardened steel contact surfaces
- This makes for a tight seal that will last for years and keep your bearings fresh
- Our spacers are made from either anodized aluminum with a press fit - hardened steel shell, or solid - hardened and ground bearing steel, depending on application
- Upgrade to Moose Racing® wheel spacers when you replace damaged wheel bearings, or before you have to

- Narrow design fits any handlebar
- Includes all hardware needed- wiring connectors & lanyard
- There are two types of electrical systems used on ATVs, Normally Open (N.O.) and Normally Closed (N.C.)
- N.O. switches are the open type; they work by grounding the primary ignition lead when the tether is pulled away from the bars. N.C. switches work the opposite of N.O.
- N.C. are typically used on battery type ignitions which may have an ignition key as an identifier
- Most newer more complex electrical system are N.C.

N.O. = NORMALLY OPEN; N.C. = NORMALLY CLOSED

HOW TO CHOOSE THE PROPER KILL SWITCH:
THERE ARE TWO TYPES OF ELECTRICAL SYSTEMS USED ON ATVS, NORMALLY OPEN (N.O.) AND NORMALLY CLOSED (N.C.) BOTH WORK BY GROUNDING THE PRIMARY IGNITION LEAD. N.O. SWITCHES ARE THE OPEN TYPE, THEY WORK BY GROUNDING THE PRIMARY IGNITION LEAD WHEN THE TETHER IS PULLED AWAY FROM THE BARS. N.C. SWITCHES WORK THE OPPOSITE OF N.O. N.C. ARE TYPICALLY USED ON BATTERY TYPE IGNITIONS WHICH MAY HAVE AN IGNITION KEY AS AN IDENTIFIER. MOST NEWER MORE COMPLEX ELECTRICAL SYSTEMS ARE N.C. IF IN DOUBT? CHECK YOUR MACHINE'S WIRING SCHEMATIC.

UNIVERSAL STARTER SOLENOID

- Fits universal solenoid for many ATVs and UTVs with round starter housings
- Multiple connections for easy installation
- Instructions included
